

## Profile

With over 5 years of experience as a Python Developer, I have successfully led the development of sophisticated e-commerce and C2C platforms, significantly enhancing back-end capabilities and user engagement. I have achieved proficiency in managing high-performance production systems, integrating complex payment systems, and ensuring data integrity and security. I am capable of developing unblocking solutions, enhancing system observability, and delivering scalable and reliable back-end solutions for scraping and parsing challenges.

## Employment History

Amazon sales manager at UAB Mobili Baltija, Vilnius

September 2018 — December 2021

- Managing shipments on the Amazon Vendor Central platform.
- Handling invoice processing through the platform.
- Developing and implementing strategic initiatives for platform optimization.
- Overseeing stock ordering to maintain adequate inventory levels.
- Conducting stock cleaning operations to ensure optimal product availability.
- Providing trend insights to inform business decisions.
- Serving as the single point of contact for all Amazon-related business.

Python Developer at UAB Mobili Baltija

December 2021 — December 2023

- Led the development of an e-commerce platform using Django, enhancing backend programming skills and handling high transaction volumes.
- Managed MySQL databases, ensuring data integrity, security, and optimal performance.
- Designed responsive and user-friendly interfaces using HTML, CSS, and JavaScript for dynamic content and interactive features.
- Engaged in end-to-end project management, navigating European market-specific regulations and multi-language, multi-currency operations.

Freelance Full-stack Developer

- Developed a C2C fashion rental platform, creating a seamless, scalable, and user-friendly interface to handle high volumes of users and listings.
- Integrated payment systems and gateways to meet client-specific geographic and operational needs.
- Utilized Django and MySQL for robust back-end solutions and HTML/CSS for intuitive front-end designs.

- Gained hands-on experience in system integration, emphasizing reliability and performance.

## Education

Simono Daukanto Gimnazija, Vilnius

July 2016

Amazon sellercentral advanced trainings, AMZ crew

April 2021

Code Academy, Vilnius

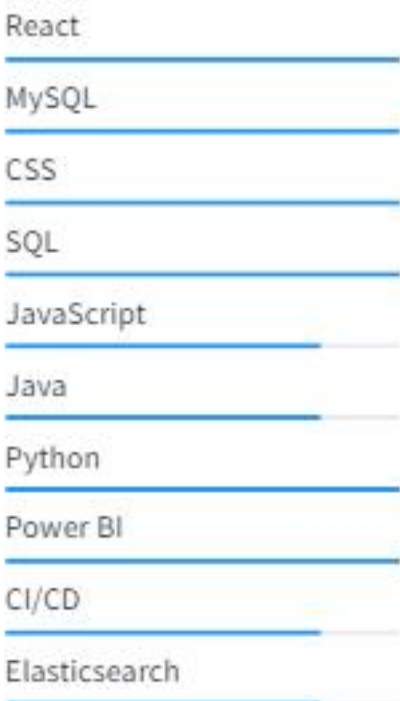

December 2023 — February 2024

I earned a top grade in a comprehensive Python course, gaining expertise in Django, Flask, machine learning, and more. I demonstrated practical application in activities like web scraping and consultations. Proficient in GUI development, unit testing, and adhering to PEP8 style guide, I bring a strong foundation in Python and related technologies. With skills in data visualization, machine learning models, and Git, I am well-prepared to contribute to projects effectively.
